Selected E-mail Archiving Solutions

Solution	Description	Website
Sanrad E-Mail Storage Pro	Sanrad is a comprehensive hardware, software, and services solution that consolidates data from multiple Microsoft Exchange servers onto a storage system.	<a href="http://www.sanrad.com">www.sanrad.com</a>
Assentor Enterprise	Assentor Enterprise is iLumin's off-the-shelf enterprise message management and archiving suite. Packaged and priced as a cross section of the entire Assentor product line, the suite provides an enterprise-level answer to handle archiving, management, retrieval, compliance, and monitoring needs for corporate e-mail and instant messages.	<a href="http://www.ilumin.com/products/assentor_enterprise.htm">www.ilumin.com/products/assentor_enterprise.htm</a>
ZipLip	The ZipLip Unified Email Archival suite provides complete e-mail archiving and management for companies using Lotus Notes/Domino, MS Exchange, Novell Groupwise, and others. The suite provides scalable storage of e-mail data, content management, regulatory compliance, life-cycle management, performance enhancement, hierarchical search and discovery, attachment management, and e-mail continuity and disaster response.	<a href="http://www.ziplip.net/products/ZLUnifiedEmailArchive.html">www.ziplip.net/products/ZLUnifiedEmailArchive.html</a>
ArchivedEmail	ArchivedEmail is an application service provider that can implement e-mail archiving within hours at no capital cost. E-mail can be accessed through a web browser. E-mail and attachments are searchable and stored offsite using NSA-level encryption.	<a href="http://www.archivedemail.com">www.archivedemail.com</a>
